SUMMARY

Software engineer who builds and sells. Seven years across software delivery, financial advisory and product. I design decision engines in regulated domains (Swiss payroll, health, retirement planning), ship them end to end on my own, and turn them into revenue: CHF 4M in client assets raised at FINKE Swiss, over CHF 300K of audit sales at Planifique. Fluent in English and French, working proficiency in German.

SELECTED PROJECTS

Saneo | Personalized health app (iOS)

Personal project | 07/2026 to present | Solo | Submitted to the App Store, in review

- Food-scanning app computing a health score adapted to each user's conditions, blood test results and daily intake, instead of a one-size-fits-all rating; LLM features powered by the Anthropic API behind an authenticated edge function.
- Took the app through five App Store rejections (health claims guideline 1.4.1, reviewer access, HealthKit, iPad crash), each diagnosed and fixed; added 22 cited scientific sources, a guest mode and a build preflight check.
- Traceable scoring engine: nutrition, NOVA, additives and contaminants sub-scores modulated by about twenty condition rules, exposing each applied modifier.

Stack: React 19, Vite, Tailwind, Capacitor 8, Supabase (Postgres, RLS, Auth, Deno edge functions), Anthropic API, HealthKit, RevenueCat

Nexora | Multi-tenant HR SaaS for Swiss SMEs

Personal project | 04/2026 to 07/2026 | Solo | In distribution discussions with C4J

- Full-stack HR platform: 53 React pages, 56 Express route modules, 73 tables with tenant isolation, role hierarchy and admin back office.
- Swiss-compliant payroll engine: AVS/AI/APG/AC/LAA with ceilings, BVG 2026 by age bracket, withholding tax scales for all 26 cantons, cantonal holidays and family allowances, covered by unit tests.
- Secure public API (SHA-256 hashed keys, constant-time comparison, scopes, HMAC-signed webhooks), TOTP 2FA, audit log, eight Swiss and international integrations (Stripe, Bexio, Skribble, Microsoft Entra).
- CI pipeline on GitHub Actions: Vitest unit tests, production build, Playwright end-to-end tests, weekly npm audit.

Stack: React 18, Vite, TanStack Query, Node.js, Express, SQLite/PostgreSQL, JWT, Zod, Sentry, Vitest, Playwright

Terravia | Where-to-live recommendation engine

Personal project | 07/2026 to 08/2026 | Solo

- Ranks 121 regions against a personal profile across 11 weighted pillars with winsorized normalization (5th/95th percentiles) and natural-language explanations; World Bank and Wikidata data with a quality-control bot (1,189 checks).

Stack: Angular 22, TypeScript, d3-geo, PWA, Capacitor, Node.js, Express, Docker, Vitest

EXPERIENCE

Project Lead, Retirement Planning

FINKE Swiss | Geneva, Switzerland | 09/2025 to 06/2026

- Specified and delivered the company's CRM end to end, from functional and technical requirements to adoption.
- Advised and sold pillar 3a, vested benefits and retirement planning: CHF 4M in client assets raised.
- Wrote specifications and internal playbooks; aligned sales, operations and leadership on the new product line.

Head of Tax & Product Development

Planifique | Geneva, Switzerland | 12/2021 to 02/2025

- Built a financial and tax audit service from scratch (09/2022 to 12/2024): software, methodology, branding, pricing and sales.
- Sold 5 to 10 audits and retirement plans per month at CHF 2,000 to 4,000 each, over CHF 300K in revenue.
- Expanded scope to wealth management and real estate advisory; ran client meetings and administrative delivery (up to 4 meetings a day).

Web Developer, then Mobile Application Developer

Sopra Steria | Lyon, France | 09/2019 to 08/2021 (work-study)

- CNAM, French National Health Insurance (12/2020 to 08/2021): delivered Java web applications in Agile squads with business analysts, QA and operations.
- bioMérieux (09/2019 to 11/2020): built mobile applications and PWAs with Angular, React, Vue.js, Java, SAPUI5 and Fiori Elements; wrote technical documentation (MkDocs).

SAP Technical Consultant

TVH Consulting / Cadexpert | Lyon, France | 09/2018 to 09/2019 (work-study)

- Client support and incident management, ABAP development and SAP fixes for several enterprise clients, technical documentation.

Mobile Application Developer (internship)

Calaosoft | France | 06/2018 to 08/2018

- Built medical calculators in a mobile app (Apache Cordova, Angular 2), from paper and digital mockups to delivery and demo.

IT Technician (internship)

W3+ | France | 05/2017 to 07/2017

- Built Android and iOS mobile applications with AngularJS, Node.js and Cordova.

SKILLS

Engineering: JavaScript, TypeScript, React, Angular, Node.js, Express, Python, Java, SQL, PostgreSQL, SQLite, Supabase, REST APIs, Capacitor (iOS/Android)

AI: LLM integration (Anthropic API), prompt engineering, AI-assisted development, automation

Quality & DevOps: Git, GitHub Actions, Vitest, Playwright, Docker, Fly.io, Netlify, Sentry

Security: RLS, JWT, TOTP 2FA, HMAC webhooks, hashed secrets, AES-256-GCM

Domain: Swiss payroll and social insurance, cross-border taxation, retirement planning (pillar 3a, BVG, vested benefits), CRM rollout

EDUCATION & LANGUAGES

Engineering Degree in Computer Science, mobile specialization | Science U, Lyon | 2016 to 2021 (work-study)

AFA Certification (Swiss financial advisory) | in progress

Languages: French (native), English (fluent), German (intermediate)
